

Creating a brighter Future at Majestic Wine...

Majestic Wine is a business that is going from strength to strength. Following a change in leadership the business is changing rapidly, yet at the heart of this change still lies the exceptional experiences customers receive and the passion and enthusiasm for wine that every member of the team holds. We supported some highly talented Managers who had been identified as potential leaders and through a series of development interventions to transition from single site Managers to leaders of teams in multiple sites. Not only were we there to develop their thinking and help them to identify new ways to inspire their teams, but we also helped them to land in their new roles and be at the forefront of the change that is happening in this dynamic and growing business.

Great feedback from the team: (Nicola Scott, L&D Manager)

“

Haydn is a brilliantly adept communicator and facilitator. His sessions are both enjoyable and informative and I came away really feeling that I had learnt something meaningful. He is clearly an expert in the field of coaching but was mindful of our lack of experience and tailored the session to meet our needs. I have tangible things that I now do differently at work that really help me in my professional relationships.
